## Education

### Linguistics and Computer Science, UCLA

GPA: 3.82 (Graduating 2025)

**Coursework:** Data Structures & Algorithms, Computer Systems and Organization, Discrete Mathematics, Statistics, Probability, Calculus

## Experience

### Full-Stack Engineering Intern — Daily Bruin at UCLA July 2022 – Present // Los Angeles, CA

- Using Python, HTML, and CSS, built tool to help UCLA students search for apartments ([link](#)).
- Collaborated with graphic designers to implement correct display of apartment rent prices and student reviews.

### Information Technician — LA Elder Law Firm April 2022 – June 2022 // Marina Del Rey, CA

- Updated forms and queries to collect data for hundreds of clients in firm database.
- Used SQL to modify dozens of records for lawyers' to-do task lists and appointments.

## Projects

### Personal Website ([link](#))

August 2022 – Present

- Designed a personal website with unique pages and navigation bar using HTML and CSS.
- Maintained main and developing branches using Git and GitHub.

### “Battleship” Video Game ([link](#))

February 2022 – March 2022

- Developed an interactive battleship game using C++ where the user plays against an Artificial Intelligence player, with options ranging from Awful, Mediocre, and Good performance levels for the AI bot.
- Utilized object-oriented programming, 2D vectors, pointers, inheritance, polymorphism, and overloading.

## Passions

### Using technology for social good.

### Supporting underrepresented groups in CS.

Interests: web development, UI/UX design, natural language programming, machine learning, artificial intelligence.

## Skills

**Languages:** C++, Python, HTML, CSS, JavaScript

**Web:** Django

**DevOps:** Docker

**Platforms:** Linux

## Organizations

### Advocacy Chair — Upsilon Pi Epsilon (Computer Science Honor Society) May 2022 – Present // Los Angeles, CA

- Collaborate with Computer Science Faculty to discuss best practices in how faculty can support underrepresented groups in Computer Science.
- Coordinate with the Association of Computing Machinery to execute Computer Science Welcome Day event to provide information and support for 500 incoming Computer Science first-year and transfer students.
- Organize Fall and Spring Quarter Computer Science Town Hall for students to directly voice their concerns about the CS department to faculty members.
- Host several panels throughout the year with alumni guest speakers with nontraditional backgrounds in CS to inspire more students to pursue passions in CS.

### Content Director — Korean American Student Association (KASA) June 2022 – Present // Los Angeles, CA

- Use Canva and Adobe Photoshop to design 100+ event graphics, club announcements, physical and digital flyers, posters, and banners.
- Create new color scheme consisting of more contrasting colors to increase accessibility for colorblind and other visually impaired audiences.
- Collaborate with fellow multimedia directors to design 2022-23 KASA logo and merchandise.
- Develop ideas for engaging and interactive content for KASA's social media channels: Instagram, TikTok, Facebook, and organization website.

### Graphic Design Intern — Korean American Student Association January 2022 – June 2022 // Los Angeles, CA

- Used Canva to design event graphics weekly.
- Collaborated with team of 15 other interns to plan, advertise, and execute Spring Quarter Field Day event, resulting in a turnout of 40+ general members.
- Organized venue, theme, and costume design for 2021-22 intern photoshoot.
